## Lightning Protection Systems

Secure Tech Electric, together with our strategic partner Certified Lighting Protection, Inc. can design and install a complete U.L. certified system for your home or office building.

### **Who Needs Protection?**

Thunderstorms occur virtually everywhere and that puts any building at risk. State-of-the-art certified lightning protection systems are a part of the structural design of thousands of commercial and public facilities worldwide and are designed to maximize protection to both life and property. Risk factors including your location, frequency of thunderstorms, soil composition and building occupancy determine the need for a lightning protection system.

For a more in-depth description of this great system go to [www.SecureTechElectric.com](http://www.SecureTechElectric.com)

## Lighting Maintenance

STE offers parking lot & building lighting maintenance, for any style fixture or lamp/ballast combination. Our utility vehicles are fully stocked with replacement components for most applications. STE is "ready to roll" within 24 hours or sooner if necessary, to insure the safety of your employees and patrons.

STE can also provide significant savings on your annual lighting costs of between 20-40%! Let us show you how we utilize the latest technology in lighting control, design, & upgrades, to assist our clients in lowering their maintenance costs with improved efficiency. Many of our lighting designs include components that qualify for LIPA rebate incentives, to further lower installation cost.
